INTRODUCTION

Waterproof Insect prevention Environmental protection Flame-retardant HD

It is based on nano bamboo wood fiber board. The whole picture can be completely printed on several wallboards through 3D printing, and it can be seamless and dense stitching. It can customize different personalized patterns and its flexibility are very popular by lots of people, and the diversity of installations has changed the traditional TV background wall.

Due to its low price, convenient and flexible installation, if you don't like the pattern after several years of use, you can remove it at any time and replace it with a new pattern. Install "3D Modular continuous painting background wall", you don't have to tear down the background wall at all, Direct modular installation can be completed within1 day because it is simple and convenient. Its diverse styles and patterns are more suitable for you, especially for the young people.

Product advantages: environmental-friendly, antifouling,waterproof (washable), Class B1 fire proof, scratch resistant, mildew proof, moth proof, lightweight, fast installation, diverse patterns, custom colors.

Installation form: it can be used as a suspended background wall with light band to make it cooler! It can be pasted on the wall with aluminum alloy modeling line, cut into various shapes and splice various patterns.
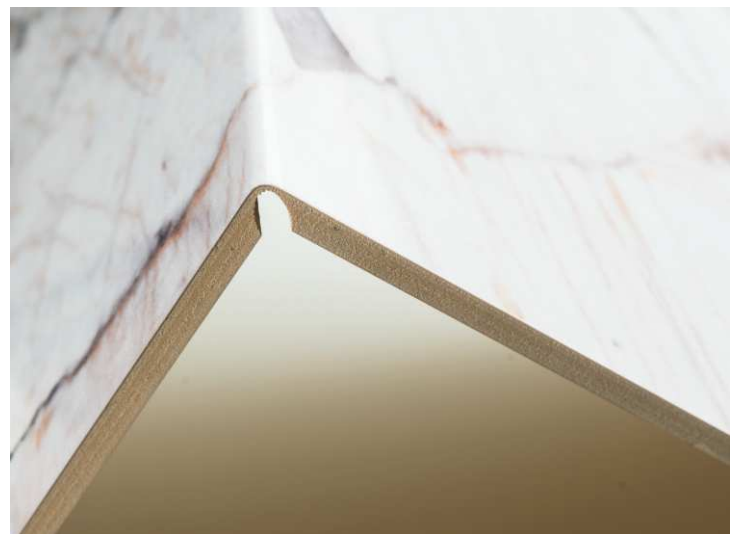

Installation time: 1-2 carpenters, and the installation can be completed within one day.
Main ingredients: Nanofiber powder.
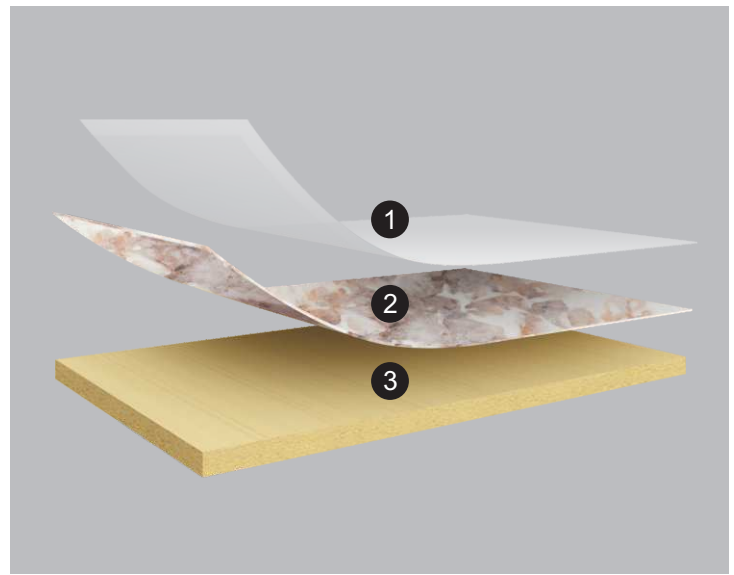

1. PET layer
2. 3D inkjet layer
3. Nanofiber layer

INTRODUCTION

Waterproof | Insect prevention | Environmental protection | Flame-retardant | HD

SPC is the abbreviation of stone plastic composite material. It is not like composite wood, but more like composite stone.

The raw material of SPC is polyester vinyl resin, which is also call the PVC material. Moreover, it strengthens the performance of PVC material.

At the same time, it is extruded by T-shaped mold, which also avoids the internal layer coating and gluing, so its functions are more abundant, and it is non-toxic, formaldehyde free and zero pollution, With a series of characteristics such as renewable materials, even in the future, the SPC floor should be able to be recycled like plastic, which can reduce the cost of house decoration.

FLUTED WALL PANEL

The wooden grid based on nano bamboo and wood fiber replaces the traditional wooden grid, which is more environmental friendly, moisture-proof and does not deform.

The traditional wooden grid will be moldy and deformed after it is used for a long time.The cost is very high and is not environmental friendly.

Now, the advantages of using nano bamboo and wood fiber material are: environmental protection, waterproof, moisture-proof, mildew proof, moth proof, no deformation, various colors, light, installed, clean, firm, durable and nice appearance.

It is very popular by lots of customers as soon as it accesses to the domestic and overseas market!
